

*CST142 – Programming in C*  
*Test #2*

---

You will find the program on iLearn, under Labs listed Test 2a. You must solve all 15 logical and syntax errors, and get the programs up and running. Then submit the working program (complete with your name/date in comments) as a .C file under the appropriate drop box. See proper output below.

```
Enter information of students:
```

```
For roll number 1,  
Enter name: Drew  
Enter marks: 95
```

```
For roll number 2,  
Enter name: Eric  
Enter marks: 75
```

```
For roll number 3,  
Enter name: Josh  
Enter marks: 85
```

```
For roll number 4,  
Enter name: Evan  
Enter marks: 80
```

```
For roll number 5,  
Enter name: Jim  
Enter marks: 50
```

```
Name                      Mark  
*****  
1. Drew                   95.0  
2. Eric                   75.0  
3. Josh                   85.0  
4. Evan                   80.0  
5. Jim                    50.0
```

```
CLASS AVERAGE :          77.0
```
